Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/5/2006 has been entered.

Remarks

2. Receipt of Applicant's Preliminary Amendment, filed on 08/18/2008, is acknowledged. The amendment includes the cancellation of claims 19-30, 33-34, 38-39, and 43-44, the amending of claims 31, 36, and 41, and the addition of claims 46-48.

Allowable Subject Matter

3. Claims 31-32, 35-37, 40-42, and 45-48 are allowed and now renumbered as 1-12.

Reasons for Allowance

4. The following is an examiner's statement for reasons for allowance:

Prior art fails to teach a combination of elements including wherein the check stack contains list of functions that have to be executed at the end of the transaction, said functions originating from Insert, Delete, and Update Data Manipulation Language (DML) operations calling up the stack maker module;

The Insert DML operation calling up the stack maker module leading to an insert process being performed on the check stack;

The insert process involving placing all checks that have to be executed as a result of an occurrence of a table type being inserted and corresponding conceptual rules being identified for the table type being inserted; and

The Update DML operation calling up the stack maker module leading to said delete process followed by said insert process being performed on the check stack, as recited in independent claims 31, 36, and 41.

Specifically, the prior art generally mentions using insert, update, and delete operations for database constraint enforcement, but does not mention using an insert after a delete operation, nor inserting and deleting processes on a check stack.

These features, together with the other limitations of the independent claims are novel and non-obvious over the prior art of record. The dependent claims 32, 35, 37, 40, 42, and 45-48 as being definite, enabled by the specification, and further limiting to the independent claim, are also allowable.
